DETAILED ACTION***Claim Objections***

Claim 6 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. All limitations recited in claim 6 can be found in the last two lines of claim 1 from which claim 6 depends.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 9-15 and 18-23 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 7-19 of copending Application No. 10/637,302. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Claims 1-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 10/637,302.

Although the conflicting claims are not identical, they are not patentably distinct from

each other because the hunting support of this instant application would encompass the bowhunting support of claims 1-6 of copending Application No. 10/637,302.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Independent claims 1, 7, and 14 are vague and indefinite in that it appears to be claiming the arms of a user or person in combination with the support which is not permitted. Evidence of such combinational claim language are found in "cradle that receives the wrist and the forearm of the bowhunter" and "strap secures the wrist and forearm...". Examiner suggests using intended usage language of "cradle **adapted to** receive the wrist and the forearm of the bowhunter" and "strap adapted to secure the wrist and forearm".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Burkhead et al (US patent no. 5,385,536). Burkhead discloses a support comprising all the claimed features of applicant's invention (see examiner's illustrations below).

Applicant's intended usage for hunter, bowhunter, hunter using a firearm are not accorded with patentable weight. Burkhead's device is inherently capable of being used by those persons.
